- Ensuring each stage of the project is progressing on time, within the scope, and to a high quality
- Facilitate online and face to face client meetings to define project scope, goals, and deliverables
- Liaising with all project stakeholders, including external third-party suppliers
- Managing client expectations
- Organizing software releases
- Understanding the service level commitments to our clients
- Working closely with Account Managers to identify new opportunities with existing clients
- Ensure project documentation, including project plan, project report, software versions, and other documentation is retained and updated
- Supporting the Project Management team in continuing project management processes improvements

We would be a perfect match if you have/are:

- Three or more years of professional IT project management experience
- Experience in implementing Scrum framework in software development
- A degree or certificate in a project management methodology (e.g., PMI, Scrum, Kanban, etc.)
- Excellent communication, negotiation, and organizational skills
- A demonstrated ability to build and manage trusting relationships with internal and external
- Confidence in managing negotiations with clients and third parties
- Solution-oriented and client-focused
- Proactive and highly committed to the work

- Willingness to learn and adapt to changes in work pace
- Aware of and sensitive to cultural differences
- Excellent command of spoken and written English

What we offer
